

CALL FOR PAPERS

12th CONFERENCE OF THE SPANISH ASSOCIATION FOR ENERGY ECONOMICS

University of Salamanca

Salamanca, February 2-3, 2017

The Spanish Association for Energy Economics (AEEE) announces the celebration of its conference on February 2nd and 3rd, 2017 in the city of Salamanca, with the collaboration of the Department of Economics and Economic History at the University of Salamanca.

AEEE is the Spanish section of the International Association for Energy Economics (IAEE) and promotes, among other activities, the organization of an annual Conference about Energy Economics. The AEEE Conference aims to emphasize the links between universities, regulators and companies with interests in areas such as Economics, Energy, Environment and Climate Change. In its twelfth edition, the main topic is the

Climate Change and, in particular, the policies about the Climate Change and the allowance prices (EUAs), all within the context of implementation of the Paris Agreement. For this purpose, academic parallel sessions (subject to *Call for Papers* and a specific assigned discussant) are complemented with plenary sessions and a round table.

Paper submission

The Scientific and Organizing Committees invite all researchers to submit original (theoretical and/or empirical) papers on any topic in the field of Energy Economics, including the main topic of this edition, before **October 28, 2016**. Each accepted paper will have a discussant. In order to strengthen mutual understanding of the conference papers and to facilitate the organization of the Conference, the speakers accept the task of discussing a paper. Authors have to submit their papers to aaaa@aeee.es. The submitted papers consist of a single PDF file with a maximum size of 2MB (no other formats will be accepted). The first page has to include the following information: name, affiliation and email address of the author or co-authors; title; abstract of no more than 100 words; JEL codes and up to 5 keywords. The papers will be evaluated by the Scientific Committee.

Red Eléctrica awards: Young AEEE Researcher 2017

Red Eléctrica de España sponsors the AEEE awards for young researchers, which aims is to promote the participation of young researchers affiliated with the AEEE in its

Annual Conference to support the dissemination of their research and access to the latest developments in the energy sector. A prize will be awarded to the best paper by a young researcher (under 35 years old) in the parallel sessions. There will be also two special mentions. Applicants for this distinction must state explicitly that they intend to opt for this award. The fact that the young researcher is the only author of the paper will be considered in a positive way. In other case, he/she has to be the corresponding author and the one doing the presentation of the work. The Scientific Committee will be responsible for the decision (including leaving the prize unawarded).
